## (54) NAIL CLIPPER

### (57)Abstract:

**PROBLEM TO BE SOLVED:** To provide a nail clipper in which not only a shaft 7 and a press lever 12 can be easily assembled, but also projecting parts 15 are securely supported in groove parts 16 to be hardly dropped off, strength of the shaft 7 can be increased, and the shaft 7 and the press lever 12 can be easily formed.

**SOLUTION:** A support shaft 7 is inserted through an upper edge body 1 and a lower edge body 2 at around respective edges 3, 4 to engage the head part 8 of the support shaft 7 to the lower edge body 2 and to project the upper end part 11 of the support shaft 7 from above the upper edge body 1 to insert the upper end part 11 of the support shaft 7 into the support recess part between both support arm parts 13 of the press lever 12 on the upper edge body 1. Both projecting parts 15 of both support arm parts 13 are engaged with both groove parts 16 of the support shaft 7. Each groove part 16 comprises an engage mouth part 17, an engage guide part 19 and a rotary guide part 18 and has both side walls and bottom walls. The support shaft 7 and the press lever 12 are formed of synthetic resin.
